

NEPEAN NIGHTOWL

INNOVATORS IN LIGHT TOWER TECHNOLOGY

DUAL AXLE 6 HEAD LIGHT TOWER

Six head 9,000 or 12,000 watt lights

Greater illumination - six directions to disperse light.

Hydraulic telescopic mast with 360° rotation

Simple operation, compact during transport. Fully extended mast is 10M high.

Fire extinguisher*

Available as part of BMA and MDG15 compliance.

High quality surface treatment

Sand blasted, zinc rich primed and powder coat finished.

Retractable draw bar

Easy sideways loading onto flatbed trucks. Extend for conventional towing and setup stability.

Emergency stop

Operator safety and asset protection.

Lockable engine cabinet

Safety feature.

Heavy duty rims

One piece 16 inch, 5 stud Land Cruiser wheels or 14 inch Ford wheels.

Dual axle configuration

Fail safe operation should the tower incur a flat during critical site works.

Sturdy checker plate mud guards

Solid construction, long lasting, protects the asset.

Tilting light head

Pitch of the lamps can be adjusted using a motorised control.

Fully bundled

Contains oil and fuel spills.

Robust anchor points, lifting eyes and fork lift pockets

Ease of lifting, safe handling and transportation. Equipped with 4 lifting eyes, 4 tie down points and 2 fork lift pockets. Lifting and tie down points can be customised to customer requirements.

Dual voltage LED tail lights

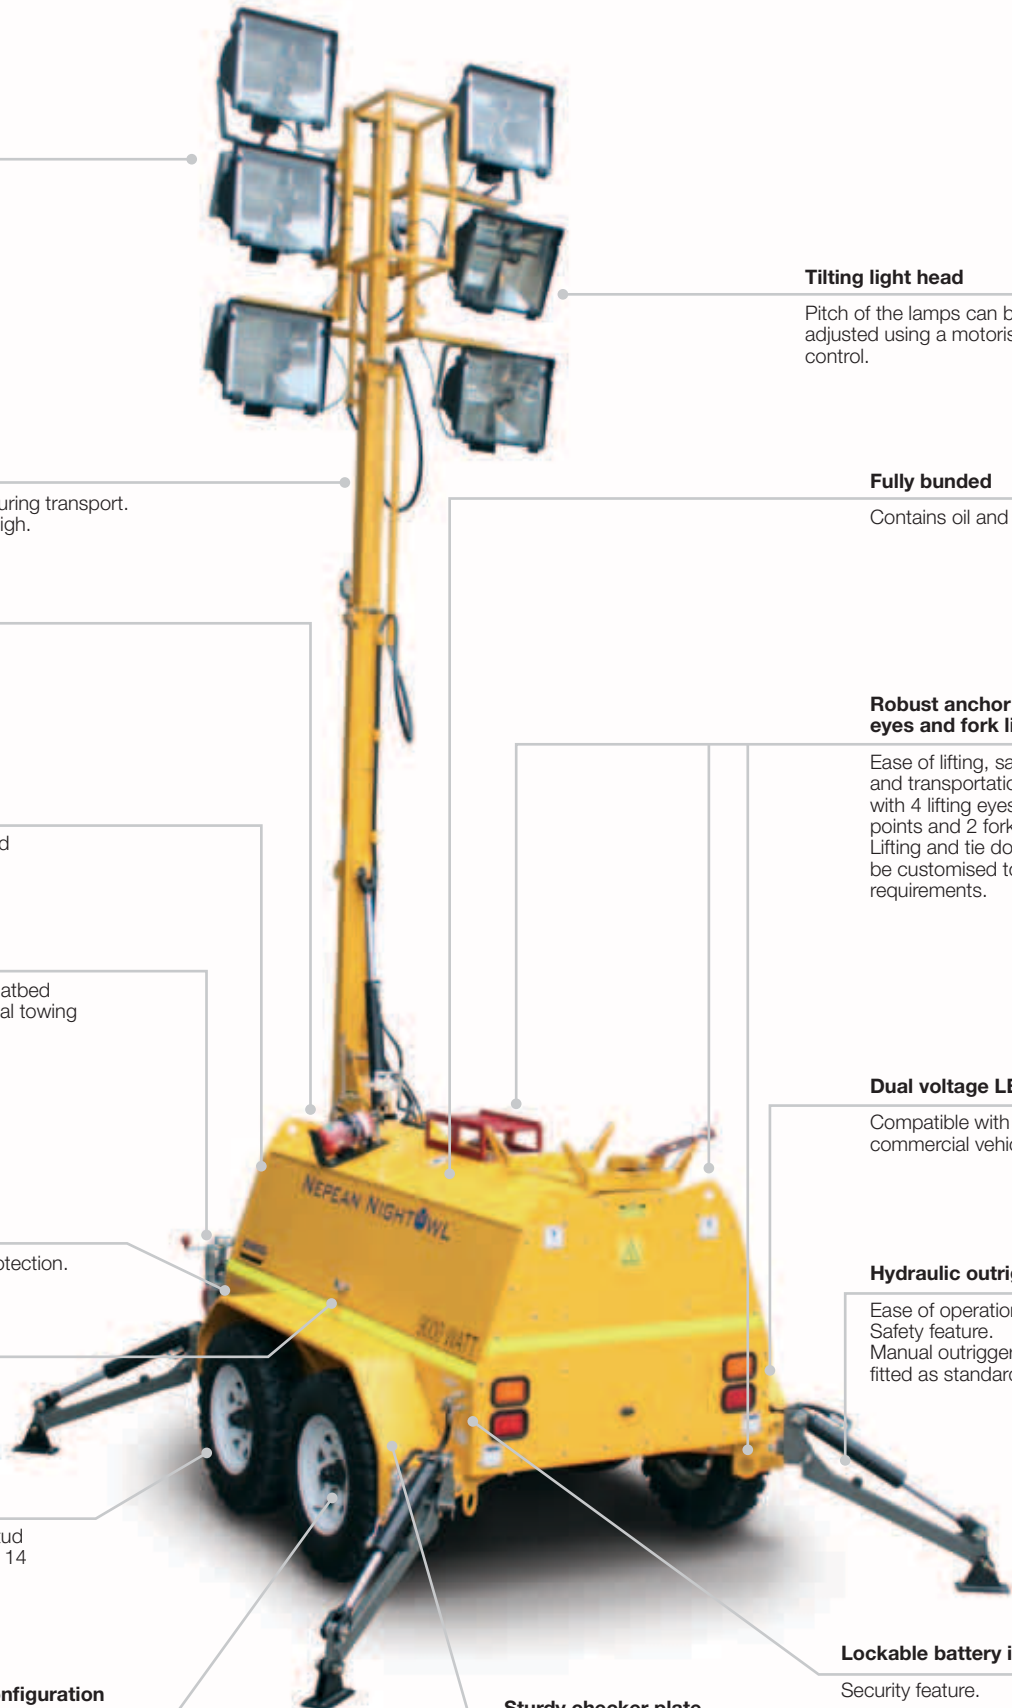

Compatible with truck and light commercial vehicle voltage.

Hydraulic outriggers*

Ease of operation. Safety feature. Manual outriggers are fitted as standard.

Lockable battery isolator

Security feature.

* optional features available for this product.
