COMPLETE IN-HOUSE TURN-KEY CAPABILITY MAKES THINGS SIMPLE

Our vertically integrated engineering design, project management, manufacturing and global sourcing capabilities enable us to offer customers a one stop shop. Customers provide us with a brief, an idea, or a problem - NEPEAN specialises in lighting the way forward. The combination of world class engineering designers, extensive product manufacturing knowledge and state-of-the-art machines, tools and equipment technology make our network of facilities a leading network for conveyor design, engineering and manufacture.

Capabilities Include:

• Design and development in compliance with industry specifications and standards
• IT integration with customers for secure data exchange and management
• Sophisticated management tools
• Global supply chain and networks
• ISO 9001 accredited
• Complete documentation process including operation and maintenance manuals in accordance with industry specifications
• Operating with the latest design software including:
  - Discrete Element Modelling on all chutes / transfers
  - Finite Element Analyses
  - 3D modelling
  - Detail engineering design
  - Static and dynamic conveyor system design and simulation
• Exclusive NEPEAN Conveyor design software package developed in-house

Since 1985, NEPEAN Conveyors has built up an elite Engineering Design & Project Management team with a professional understanding of conveyor dynamics. Team members are carefully resourced according to project specific requirements in terms of experience, specialist skills and problem solving capabilities.
Conveyor Engineering Design & Project Management

Our fully integrated approach together with NEPEAN Power and NEPEAN Longwall removes the difficulties surrounding the integration of engineering, mechanical, electrical, commissioning and installation.

LARGEST IN AUSTRALIA

NEPEAN Conveyors is the large scale mining conveyors projects arm of NEPEAN Mining, NEPEAN Mining is a division of NEPEAN™, Australia’s largest privately owned engineering, mining services and industrial manufacturing organisation. NEPEAN Mining provides an extensive portfolio of Conveyors, Power and Longwall products and services to Australia’s mining industry. Each can independently deliver unique, high quality results, or as one company, we offer a one stop mining solution.

WITH MORE LOCATIONS, WE’RE NEVER FAR AWAY

We design and manufacture in multiple locations around the world.
